Zen and the Art of Tea

In many minds, the formal tea ceremony is an iconic representation of Japanese culture, and today it is even more incorporated in the Japanese lifestyle than it is in China, from which the ceremony was borrowed nearly 900 years ago. The tea ceremony is in many ways synonymous with Zen, since both arrived in Japan from China at the same time. Tea had long been valued by Ch'an monks in China to keep them awake during meditation. In the 12th century the first Zen master in Japan returned from China bringing Rinzai Zen as well as a new way to make tea - mixing powdered green tea and hot water in a bowl, with a whisk.

Mindfulness is essential to Zen practice. A great many arts and ceremonial practices of Zen require complete attention. So it was with brewing and drinking tea. Over time, Zen monks incorporated tea into Zen practice, paying attention to every detail of its creation and consumption.

Rikyu, who was a Japanese tea master, devised a style of tea bowl called *raku*. These bowls are usually red or black and shaped by hand. Imperfections in shape, colour and surface texture make each bowl unique. It is not known exactly why Rikyu fell out of favour with Hideyoshi, a Japanese ruler, but in 1591 the elderly tea master was ordered to commit ritual suicide.

There are several variables in a traditional tea ceremony, but commonly the guests will wash their mouths and hands and remove their shoes before entering the room for the ceremony. Food may be served first. The host lights a charcoal fire to heat water in a kettle and cleans the tea tools. Then the host mixes the powdered tea and water with a bamboo whisk.

Guests sip tea from a single bowl, which is passed among them according to ritual. When participants are fully engaged, the ritual evokes great peace and clarity and a deep intimacy with oneself and the others present.

Elvis

A. It's hot and sticky in the summer in Memphis, Tennessee. The sea is hundreds of miles away from this city on the Mississippi river, yet that doesn't stop the tourists from coming. Some come just once, others make the trip regularly.

D. He liked the good things in life: girls, guitars and Cadillacs — and he sang about them regularly. That was one of the reasons why he became such a star. The other reason was, of course, that Elvis really was a good artist, and he really did change the face of American popular music.

B. These are the real fans, those for whom rock 'n' roll has only one voice, that of "the King" himself: Elvis Presley. Memphis is the city where Elvis lived for most of his professional life; and though he died in 1977, Memphis has not forgotten him.

E. As a young rocker, he was America's biggest star, and this reputation followed him into middle age. His energy and his looks, however, did not. By the time he was forty, Elvis was a sick man, dependent on drugs. The thin athletic youth had become a fat prematurely-aged man. It was not surprising, really, that he did not survive beyond the age of 42.

C. On the contrary, America's most famous rocker (the only one to have had his picture on a set of U.S. postage stamps!) has become the city's most famous son — and seems to get more and more important as the years go by.
